

Pathfinder is a licensed applicator exclusive to US land for Spiralbanding Technology by Postle

What is Spiralbanding?

- *New Technology That Increases Drill Pipe Life*
- *Specialized Welding Technique To Apply Hardfacing To Tubular Bodies*
- *Utilizes Postle's SpiralBand NC Wire*
- *A Solution To Address Tubular Bodies Being Downgraded Due To Wall Loss*

Benefits of Spiralbanding

- *Double To Triple The Life Of Tubular Bodies With A Single Application*
- *Reduces The Frequency Of Replacing Drill Pipe*
- *Lowers Overall Well Costs During Drilling Operations*
- *Technology That Allows For The Utilization Of Downgraded Drill Pipe*
- *Unique Spiral Design Benefits Hole Cleaning*
- *Increases The Life Of The Non-Spiralbanded Drill Pipe In The Vertical Section Of The Well As It No Longer Needs To Be Rotated To The Lateral*

Equipment

- *Patented Welding Technology With Built In Safeguards For Protection Of Product Integrity*
- *Designed Specifically For Applying Spiralbanding*
- *Lathe Components Ensure Accurate And Consistent Application*
- *Electronically Records Application Process For QA Of Each Application*
- *Ability To Handle Tubulars With An Outside Diameter Of Up To 10"*
